First : Green Forest Construction uses only ¾" SUBFLOOR PLYWOOD ([www.advantechperforms.com](http://www.advantechperforms.com)).

THEN : we NAIL and SCREW all SUBFLOOR SURFACES!

(<http://www.strongtie.com/products/quikdrive/applications/subflooring.html>)

Photo below of ACTUAL screws used to screw all subfloor surfaces!

The screenshot shows the Quik Drive website interface. At the top, there is a navigation bar with links for 'About Us', 'Where to Buy', 'For Homeowners', and 'International'. Below this is a search bar with 'Google Custom Search' and a 'Search' button. The main header features the 'QUIK DRIVE Auto-Feed Screw Driving Systems' logo and a navigation menu with 'Applications', 'Systems / Attachments', 'Fasteners', and 'General Information'. The 'Subflooring/Sheathing' section is highlighted, and it includes a 'Print this page' and 'Email this page to a friend' option. A photograph shows a person using the Quik Drive tool on a subfloor. To the right of the photo, there is a description and a list of features.

**Subflooring/Sheathing**

Quik Drive auto-feed screw driving systems are ideal for subfloor applications because the holding power of screws reduces gaps that cause floor squeaks, and the extension enables stand-up-and-drive subfloor installation.

- Recommended for wood and steel framing
- Fasten 2,000 sq ft in just over an hour
- System warns when screw misses joist
